After the prolongation of ENSAR, it was planned to organize in collaboration with Arjan Koning and his colleagues a lecture week including practical training on the usage of TALYS for Nuclear Astrophysics. This lecture week was supposed to take place at Goethe University Frankfurt, Germany. The funding for travelling and local costs for the lecturers, coffee breaks, lunches, and – if possible – to support travelling for participants without own funds was to be financed within ATHENA. Unfortunately, the first possible date for the lecturers turned out to be in February 2015. Therefore, this event could not take place within ATHENA.
